

(1) the use of copyrighted works to train AI models; I feel like using copyrighted works to train AI models is not a good idea. I don't think AI is a very good thing in general. I agree with the fact that people can try to use AI for good purposes but I think that AI isn't good for people who are in need of finding work. I feel like AI is the reason why so many businesses are shutting down and people are losing jobs. I think that in order for AI to become better, it needs to be used for reasons that are beneficial and not for something negative.
